Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Shadcn UI, MUI, Bootstrap
Backend: Node.js, Express.js, REST API Design
Databases: MongoDB, MySQL, Mongoose
DevOps & Tools: Docker, Git, GitHub, Postman, ZOHO
Concepts: Role-Based Access Control (RBAC), JWT Authentication, Data Modeling, Microservices

Experience

Full Stack Developer Jan 2023 – Present
Cynoteck Technology Solutions (Deputed at IIRS/ISRO) *Dehradun, India*

- Leading end-to-end MERN stack development of **nationwide government applications** for the Ministry of Urban Affairs, deployed across India under ISRO's Indian Institute of Remote Sensing (IIRS).
- Architected and built a **role-based access control (RBAC) system** managing multiple user roles with scoped permissions across project, user, and geospatial survey workflows.
- Designed and optimized **MongoDB schemas and queries** for large-scale spatial and project datasets, improving query performance for high-volume administrative data.
- Built and deployed **RESTful APIs** with Node.js/Express.js using secure JWT authentication, and **containerized applications with Docker** across the full pipeline from development to production.
- Collaborated directly with government stakeholders to define requirements, iterate on features, and deliver production-ready solutions on schedule.

Web Development Intern Aug 2021 – Dec 2021
CodeJi InfoTech Pvt Ltd *Dehradun, India*

- Built reusable React.js component library and contributed to frontend architecture for production web applications.
- Developed a fully responsive e-commerce platform with product browsing, cart management, and checkout flow using React.js and REST APIs.

Projects

Amrut Sankalan | *MERN Stack, React.js, Node.js, MongoDB, Tailwind CSS, Docker* IIRS/ISRO

- Led full-stack development of a nationwide **role-based project and survey grid management dashboard** for the Ministry of Urban Affairs.
- Built interactive **geospatial map visualization** enabling admins to view, filter, and assign geographic grids across Indian cities.
- Implemented JWT authentication, RBAC, and secret-key plugin integrations; designed scalable **REST APIs** and optimized **MongoDB aggregation pipelines** for spatial and administrative datasets.
- Containerized and deployed the full application stack using **Docker** in a production environment.

Survey Management System | *MERN Stack, React.js, MongoDB, Docker* IIRS/ISRO

- Built a fully customizable dynamic survey platform with **multi-step form builder**, real-time preview, and access-controlled publishing workflow.
- Designed flexible **MongoDB schemas** supporting dynamic form structures — questions, validations, and response types stored as configurable documents.
- Developed **analytics dashboards** with chart-based visualizations (chart.js) and CSV data export functionality.
- Deployed scalable backend services using Docker with secure data handling and role-based access control.

Cliff Climbers | *React.js, Node.js, MySQL, REST APIs* Cynoteck

- Developed responsive e-commerce interfaces in **React.js** — product listing, details, cart, checkout, and order tracking — integrated with REST APIs.
- Built reusable components and implemented filtering, sorting, and pagination for efficient product browsing across large catalogs.
- Collaborated with the team on backend features (Node.js/MySQL) including inventory, offers, and payment workflows, contributing primarily to frontend development.

Education

Master of Computer Applications (MCA) 2022 – 2024
Graphic Era University *Dehradun, India*
Bachelor of Science – Information Technology 2018 – 2021
D.A.V. PG College *Dehradun, India*
